

PRE FILTER

PRE FILTER FOR THE MG-UNITS

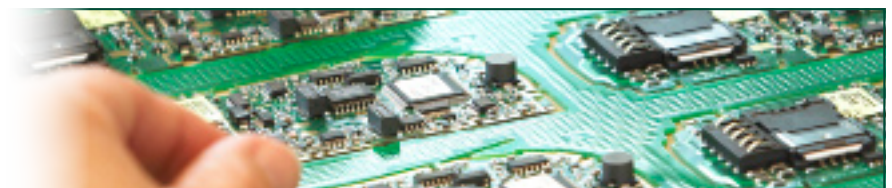

Pre filter for the high airflow systems MG75, MG95 and MG100. The pre filter is mounted on the filter system. The filter media is of "bag" type model with a high separation degree and is very easy to change.

The pre filter will increase lifetime of the main filter, especially in lead free soldering applications and other applications where a lot of particles and heavy fumes are build up. When working with this kind of applications the pre filter is a very cost effective investment.

Filter Systems

Filtronic AB is striving to create a better workbench environment by developing and producing particle and gas filter systems of very high quality. The filter systems have a long filter lifetime and low energy costs, are easy install, have a low noise level and a guaranteed function of both gases and particles.
